

Our Three Option Approach To Helping You Work Safely During The Coronavirus Crisis.

Audit your workspace

Receive live guidance

Bolt on accredited training

With everything else you have to deal with during these difficult times, wouldn't it be great to have at least one aspect simplified? Zenith Training have designed three options which will provide businesses with the help and support you need to ensure your working environment is safe and compliant. Designed for a full range of different working environments we will help you to quickly, simply and effectively get your business back up and running.

Delivered in a fully COVID complaint manner, our three options are as follows:

Option 1 – Working Safely Audit Template

We will provide you with a workspace specific audit template that will take you step by step through all of the areas you need to consider in order to ensure your workplace is compliant with Government guidance. From the audit you will be able to identify and action the changes you need to make to ensure your employees, customers and stakeholders are safe.

Option 2 – Audit Support Workshop – including Audit Template and supporting Checklist, Workplace Signage templates and Policy template

A more guided approach, option 2 not only gives you access to the Audit Template, but face-to-face support is provided in the form of a 2.5 hours training workshop and Q&A session. Armed with this additional information and support, along with checklists, signage and policy templates, you and up to 5 members of your team will receive the knowledge and skills needed to be able to ensure your work environment is compliant, and all the information you need to be able brief your employees on how to keep themselves safe.

Option 3 – Bolt-on Accredited Training

As you work to make your workplace safe and compliant, you may identify areas where you'd like to increase your understanding, skills and capability. Risk Assessment and First Aid are obvious areas, however, you may also wish to add COSHH or Mental Health First Aid to your skill set. We've developed a range of short, sharp, accredited training courses to support businesses in areas we feel are particularly relevant – see the list on the right.

Whatever level of support you feel your business needs we're here to provide it quickly and simply. We can help you negotiate the detail and implement an effective and workable solution tailored to your workplace.

Our Training Courses:

Risk Assessment

COSHH

Accident Reporting

First Aid (and First Aid Refresher)

Health & Safety in the Workplace

Level 3 Health & Safety Apprenticeship

Principles of Fire Safety

Mental Health First Aid and Mental Health Advocacy in the Workplace
